EXPERIENCE

Software Engineering Intern

May – Jul. 2024

Lockheed Martin

Marietta, GA

- Improved sprint completion rates by **25%** through the development of a **Tableau** Feature Completion dashboard that streamlined task prioritization and feature status tracking
- Eliminated **20+** hours of manual data processing by developing a **C#** Microsoft Installer application that automated Excel parsing and standardized report generation workflows
- Adapted to **Agile** workflows, actively participating in daily stand-ups, biweekly sprint planning, and code reviews, ensuring smooth collaboration and **iterative development**.

Software Engineering Intern

Jun. – Aug. 2023

Lockheed Martin

Marietta, GA

- Increased team performance tracking efficiency by **25%** through engineering **3 Tableau** dashboards that automated **Jira** metrics visualization
- Reduced manual input errors by **45%** enhancing a **C#/HTML** reporting tool with automated data scraping and validation features

PROJECTS

Suicide & Depression Detector | *Pandas, NumPy, scikit-learn, TensorFlow, PyTorch*

Fall 2024

- Collaborated with two developers to engineer a **BERT-based** detection model with **LLM reinforcement**, achieving **95.5%** accuracy and improving context/sarcasm detection
- Enhanced model robustness on ambiguous text by designing an **LLM-reinforced pipeline** to identify and correct misclassifications
- Automated preprocessing of **230,000** social media data points with **Python**, ensuring a clean and labeled dataset

Emporia | *Flutter, Dart, Stripe API, Google Cloud*

Spring 2024

- Built a marketplace app utilizing **Flutter/Dart** with three team members, integrating **Stripe API** for payments and **Google Firestore** for real-time data handling
- Led **UI/UX** design in **Figma**, conducting **A/B testing** with **50+** users to improve experience by **25%**
- Boosted application security by implementing **Firebase Authentication** to restrict access to only '.gatech' users, increasing security by **75%**

Airline Management System | *SQL, MySQL*

Fall 2023

- Created an airline management system with **MySQL** to track schedules, pilots, and passengers, supporting the management of **500+** flights and simulating real-world operations
- Developed key functionalities, including route management, flight time calculations, and frequent flyer tracking, to enhance system utility

SKILLS & ORGANIZATIONS

Languages: Java, Python, C/C++, C#, SQL(MySQL), JavaScript, Dart, HTML/CSS

Frameworks & Libraries: React, Flutter, Pandas, scikit-learn, NumPy, PyTorch, TensorFlow

Tools & Technologies: Tableau, Git/GitHub, Jira, Figma, Docker

APIs & Cloud: Stripe API, Google Cloud, Google Firebase

Organizations: Hive Makerspace Peer Leader, FASET Orientation Leader, GT WebDev, Robo Jackets, GT Swim Club

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Master's of Science in Computer Science

Expected Fall 2025

Georgia Institute of Technology

Atlanta, GA

Bachelor's of Science in Computer Science, GPA: 3.61

Dec. 2024

- Relevant Coursework: Database Systems, Mobile Applications & Services, Machine Learning, Natural Language Processing, Knowledge-Based AI
